TITLE : MANUFACTURING METHOD OF
OPTICAL DISK PACKAGE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a manufacturing method of optical disk packages which can efficiently and properly manufacture an optical disk package such as a DVD.

SOLUTION: The manufacturing method of optical disk packages includes a process of opening a lid of a box on a carry conveyor to develop the box 101 and separating a cover sheet 104 attached to a surface of the box from the surface, a process of moving the box on the carry conveyor toward a turn table and inserting a graphic paper piece 105 supported on the turn table into a clearance formed between the surface of the box and the cover sheet, a process of moving the box with the graphic paper piece inserted on the turn table onto the carry conveyor, a process of mounting an optical disk on the box at a predetermined position of the carry conveyor so that it can be inserted/ removed, a process of mounting a booklet 106 inside the lid of the box on the carry conveyor, and a process of closing the lid of the box on the conveyor to overlay on a box body.
